Study guide for medical coding

Learn medical billing and coding faster with interval repetitions. Use digital flashcards to help you study anytime, anywhere! next| 2 3 4 5 6 7 8 9 10 11 . . 200 data url= claims and coding> To ensure that all types of health services can be properly classified, healthcare professionals have developed a comprehensive systematization system for the many diseases and conditions people seek treatment for. This complex system, which has evolved for more than a century, is now known as ICD-10. ICD-10 contains codes for common and non-common diseases and medical conditions, as accurately as possible. Medical coders are not expected to memorize the approximately 68,000 codes found in ICD-10, but they are expected to understand the system and, most importantly, how it applies to medical billing practices. In short, the medical coder interprets the doctor's notes and translates them into recognized medical and billing codes. In particular, these codes, rather than doctor's notes, ultimately determine what medical procedures will be refunded. While ICD-10 plays an important role in the work of medical coders, it is also expected to be familiar with two manuals: CPT (current procedural terminology) and HCPCS (Healthcare Common Procedure Coding System) Level II. AAPC CPC Exam Structure AAPC CPC (American Academy of Professional Coder Certified Professional Coders) exam consists of 150 multiple choice questions. Candidates complete the exam in 5 hours and 40 minutes. Unlike many other certification exams, CPC exams are open book exams. In fact, candidates are required to bring copies of icd-10, CPT and HCPCS manuals to the exam. The exam consists of 17 different content areas, each of which consists of 8 to 10 questions. The following decomposes each content area. First, we'll give you some general tips on how to prepare for this unique and challenging certification exam. How to prepare and prepare for AAPC CPC covers many topics. Therefore, it is important to have a clear plan when preparing for the exam. Among other things, the following points are certain: • Understand how to access the information in the three manuals (ICD-10, CPT, and HCPCS). It has been tested for its ability to find these codes accurately and expediency, rather than the ability to memorize thousands of codes. • Bring all three manuals to the test - otherwise you're sure to fail!• You're allowed to bookmark frequently used sections of the manual, so do it when preparing for exams. You are also allowed to create marginal notes for manual copies. • You don't need a perfect score to pass, so if the question is particularly long and complicated, skip it and move on to the next question. You need 70% to pass the actual exam, so aim to answer at least 80% of the questions correctly. Content Area 1:10,000 Series CPT10 questions on the subject of surgical procedures performed in the Imperial system. By definition, the integrity system is an organ that protects the body from damage. Skin, nails and hair are all part of this system. In the trial, you may also come across questions about cysts. You need to understand the functions of the system, its parts, and its association with diseases. Content Area 2: 20,000 Series CPT Prepare to answer at least 10 questions on the topic of surgical procedures performed in the musculoskeletal system, including those parts of the system located in the head, neck, back, spine, abdomen, shoulders, arms, hands, fingers, pelvis, hips, feet and feet and toes. Content area 3: 30,000 series CPT There are a total of 10 questions about surgical procedures performed in the following four systems: • Respiratory system (e.g. nose, larynx and lungs) • Cardiovascular system (e.g., heart, arteries and veins) • Blood and lymphatic system (e.g. spleen and lymph nodes and channels)) • Septum and diaphragm content area 4: 40,000 series CPT 10 Questions focus on surgical procedures performed on lips, mouth, palate, salivary glands, eating path, stomach, intestines, appendix, rectum, anus, liver, biliary, pancreas, abdomen and digestive system. Content area 5: 50,000 series CPT Also expect to encounter 10 questions about surgical procedures performed in the following four systems and situations. • Urinary system (e.g. kidneys, hair loss and urethra) • Male reproductive system (e.g. penis, Testes, scrotum and spermat umbilical body) • Female reproductive system (e.g. vulva, vagina and uterus) • Obstetrics and childbirth • Prepare to answer 10 questions about surgical procedures performed in the endocrine system (e.g., thyroid, pancreas and adrenal) content area 6:60,000 series CPT nervous system (e.g., brain, spine and outer skull and peripheral nerves). Content Area 7: Assessment and Management Questions grouped under Assessment and Management focus on the types of services offered in special departments and under special conditions. In this section, we expect to find questions to test our knowledge on the following topics: • Office/other outpatients • Hospital admissions • Hospital admissions • Hospital admissions • Consultations • Emergency departments • Emergency care • Nursing facilities • Residential and rest areas • Home services • Long-term services • Case management • Care plan monitoring • Preventive medicine • Non-face-to-face service • Special E/M • Neonatal care • Neonatal and pediatric critical care and intensive care • Complex chronic care coordination • Transitional care management content area 8: Anesthesia anesthesia, one of the most expensive parts of medicine, is a separate content area on AAPC CPC. Be prepared to answer questions about reporting, eligibility status, physical condition regulators, and anesthesia for surgery.Maternity services. Content Area 9: There are 10 questions about diagnostic radiology and ultrasound, mammography, bone and joint research, oncology, and nuclear medicine are broadly defined. Content area 10: Laboratory pathology Another important content area concerns laboratory pathology. In this section of the trial, • Organs and disease panels • Drug testing • Therapeutic drug assays • Wake tests • Consultation • Urine tests • Molecular pathology • MAAA • Chemistry • Hematology and coagulation • Immunology • Transfusion microbiology • Anatomical pathology • Cytogenetic studies • Surgical pathology • In vivo and reproductive content areas 11: Medicine is related to medical topics related to any of the following specific areas of knowledge it also presents 10 questions: • Vaccinations • Psychiatry • Bio-feedback • Dialysis • Gastroenterology • Ophthalmology • Otolaryngology • Cardiovascular • Noninvasive vascular studies • Lungs • Allergy and immunology • Endocrinology • Neurology • Genetics • Central nervous system assessment • Health and behavior assessment • Health and behavior assessment • Hydrate • Treatment and diagnostic management • Chemotherapy management • Photodynamic therapy • Dermatology • Physical medicine and rehabilitation • Medical nutrition • Osteosclerosis treatment • Chiropractic chiropractic treatment • Patient education and training • Non-facial non-physician services • Secondary subsidiary content area 12: Medical terms expect 8 questions about medical terms about the system of the human body (for example, be prepared to answer questions about parts and functions of the circulatory system, parts and functions of the skeletal system). Content Area 13: Anatomy prepares for 8 questions about anatomy in relation to all systems of the human body. Content Area 14: ICD-10-CM/Diagnostics 10 questions focus on icd-10 coding and reporting, and official guidelines for diagnostic questions. In particular, diagnostic questions may also appear elsewhere in the exam. Content Area 15: HCPCS Level II 5 Questions will focus on co-adjusters for Medicare patients (double-digit codes that change another service or procedure), supply, medicine, and professional services. Content Area 16: Coding Guidelines Six questions will focus on icd-10 coding and reporting official guidelines and CPT coding guidelines and notes. Once again, this means that you need to know as much as possible about both of these manuals. Content Area 17: Compliance and Regulation Finally, the five questions will focus on compliance and regulation. As a result, be prepared to answer questions in the following subjects: • Services covered under Medicare Parts A, B, C, and D • HIPAA (Health Insurance Portability and Accountability Act) • NCCI (National Positive Coding Initiative) Editing • NCD/LCD (National)Decision/Regional Coverage Decision) • Abn (Non-Coverage Advance Beneficiary Notice) • Rvus (Relative Value Unit), part of the Medicaid refund formula for physicians • How to apply coding to payment policies • How to identify and report fraud and abuse You plan to study for the AAPC CPC exam for at least two months. The more you know without using a book during the exam, the better. Complete all questions within the all-assigned time frame to achieve the highest score. Try the POCKET PREP AAPC CPC exam preparation app and study with AAPC textbooks! AAPC ICD-10-CM Codebook (2020) AMA CPT Professional (2020) AAPC HCPCS Level II Expert (2020) (2020)
